To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters." .Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." .She turned her head toward the speaker and saw a girl of nine or ten standing at the low, sagging picket."What stuff?" Bobby asked."That would be quite all right," Celia said.. "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin..Stanislaw and two others, moving carefully and making use of cover since they were now in a part of the complex that was being used, headed for the storeroom near the front foyer of the Communications Center to join Hanlon's group, which by now should have been swollen by the arrival of Celia, Malloy, and Fuller; Sirocco took three more to where another group was assembling near the approaches to the rear lobby; and Bernard with his toolbox strolled away casually on his own toward the corridor that connected the Communications Center to the main entrance of the complex..Although Colman was going along with the mood and making a joke out of it, inside he felt a twinge of irritation. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for.."It was a depressed fracture," said Geneva. Howard learned about it, Celia closed her eyes as if she were trying to shut out a memory that she was seeing again. "He lost control of himself completely there was a fight, and.." She left the rest unsaid. After a few seconds she opened her eyes and stared blankly ahead again. "Maybe I wanted him to find out-provoked him to it. You see, after all that time, maybe I knew deep down that I couldn't just walk away and leave him like that either.' What other way was there?" Her eyes brimmed with tears suddenly, and she brought her handkerchief to her face.
